

A Visit to Optika Mumbai Exhibition 2025

Date: 1st February 2025

Venue: Goregaon, Mumbai

Participants: Faculty and Students from Laxmi College of Optometry, Panvel

On February 1, 2025, a group of faculty members and enthusiastic students from Laxmi college of Optometry, Panvel visited the Optika Mumbai Exhibition held at Goregaon, Mumbai. The exhibition showcased the latest advancements in **optometric technology**, providing a valuable learning experience for all attendees. The exhibition provided an excellent platform for learning about the latest advancements in eye care, diagnostic tools, and optical technologies.

The exhibition featured various stalls and demonstrations by leading organizations in the field of **optometry**, including manufacturers of ophthalmic instruments, contact lenses, spectacle lenses, and diagnostic equipment. It provided a platform to interact with industry experts, researchers, and fellow professionals, fostering knowledge exchange and networking opportunities.

Some key highlights of the exhibition included:

1. **Advanced Diagnostic Equipment:** Demonstrations of the latest Lensometers, autorefractors, cutting-edge ophthalmic instruments, and phoropters.
2. **Contact Lens Innovations:** Introduction to newly developed scleral lenses, orthokeratology lenses, and hybrid lenses.
3. **Innovation:** spectacle lens, software development for the optometry field.
4. **Networking and Industry Collaboration:** Interaction with professionals, researchers, and representatives from leading optical brands and institutions.

The visit proved to be an enriching experience for both faculty and students, enhancing their understanding of emerging trends in optometry. It also provided an opportunity to explore potential collaborations for Academic and clinical advancements. The students gained practical exposure to the application of theoretical knowledge, reinforcing their academic learning.

Overall, the exhibition visit was a highly productive and insightful event, inspiring students to stay updated with technological advancements and innovations in the field of optometry.
