

## World Optometry Day 2023

World Optometry Day was celebrated with great enthusiasm over the course of two days. On the first day, students from Laxmi College of Optometry joined their peers at D.Y. Patil College and MGM College to commemorate the occasion. The event began with informative addresses on the optometry profession, setting the stage for a series of engaging activities. Students showcased their skills with case presentations, followed by a thrilling quiz competition and a cultural program that added vibrancy to the event.

The second day, hosted at MGM College, featured a model-making competition, where students from Laxmi College showcased their creativity by crafting models of a gimbal scope, pegboard, and NLD. The day also included the second part of the quiz competition, sponsored by Bausch and Lomb, in which two students from Laxmi College earned spots in the coveted top three rankings. This two-day celebration not only highlighted the significance of optometry but also fostered collaboration and creativity among future optometrists.
