

Report: Anatomical Illustration Contest

Date: 06/Oct/2025

Venue: Laxmi College of Optometry

An “Anatomical Illustration Contest” was organized by Laxmi College of Optometry for 1st, 2nd, and 3rd-year students on the topic “Anatomical Structure of the Human Eyeball.” The event aimed to encourage students to showcase their creativity while reinforcing their academic understanding of ocular anatomy through artistic representation.

The competition witnessed enthusiastic participation from students across all batches. Each participant presented detailed and well-labeled anatomical diagrams, demonstrating both scientific accuracy and artistic skill. The atmosphere was filled with joy, enthusiasm, and a spirit of healthy competition.

After careful evaluation, the following students were declared winners:

- 1st Prize: *Ms. Sanjeevani Ade* (First Year Batch)
- 2nd Prize: *Ms. Swarnim Harwande* (Third Year Batch)

The winners were appreciated and presented with a small token of appreciation, graciously arranged by our Vice Principal, Mr. Rakesh Kaushal, and handed over by the faculty members of the college.

The judges appreciated the effort, clarity, and precision shown in the drawings. The students expressed that this activity was a fun and effective way to recall what they had learned in their anatomy classes. They also shared that such diagrammatic representation will help them differentiate normal ocular structures from abnormalities when they begin their clinical postings in the Laxmi College of Optometry OPD (LCT OPD).

Overall, the competition proved to be an excellent blend of learning and creativity, reinforcing theoretical knowledge through visual expression and collaborative participation.

Glimpse of the event
